

Breeman International Supplies

"Today millions of cubic meters are moved by products which are developed, produced and maintained by Breeman International Supplies".

Breeman International Supplies, founded in 1961, developed into a leading manufacturer and engineering company in the dredging industry. All major dredging companies worldwide use products made by Breeman. In addition to a range of self-propelled cutter suction dredgers, Breeman markets several dredge components and solutions, both standard as well as tailor made. Being in the dredging industry for so long, Breeman realizes that all her products should increase production, secure a smooth dredging process and optimize dredger time at work.

To outsiders, making pipes and pipe segments may look a simple process. Breeman International Supplies delivers pipes and pipe segments in all possible, process related, materials and thicknesses, according to customer specific welding specs, with flanges, concentric or eccentric, cones and joining pieces. To make the right choice of specifications, customers often appeal to the craftsmanship and advices from our specialists.

Making suction mouths requires a high level of craftsmanship. For many years, Breeman is known as an expert in this specialized field

In this particular example the wear plate consists of very durable wear resistant chromium carbide coating melted to a soft back plate.

A lot of spare parts for the dredging industry are masterpieces of construction, with no room for tolerances, high wear-resistance and top of the bill reliability.

Breeman International Supplies

Breeman International Supplies delivers a range of unique standard products. With the quality label "A BREEMAN PRODUCT", these innovative standard applications are highly appreciated and wanted, both nationally and internationally, for their practical applicability, reliability and durability.

Breeman pumps are well-known for securing a smooth dredging process and optimizing dredger time at work. Breeman Pumps are available Single or Double Walled, with Low or High Pressure and with 3 or 4 bladed impellers.

Drag-heads of various sizes and design are build in selected high quality materials to ensure long life span and low maintenance costs. High Cr cast irons, high grade A steel, GS 42 CrMo4, are just a few examples.

Through the collection of advice and information, with on site maintenance engineers, Breeman International Supplies is able to offer the most economic and reliable solution for sealing i.e. the **Breeman Aqua Seal**.

Breeman International Supplies is known for its craftsmanship and precision. Like with **Breeman shafts**, our personnel made it possible to machine metal with the smallest thinkable tolerances.
