

Breeman International Supplies

Information for Technical Calculations for Dredge Pumps.

- A Required production of the Dredger: m³/h
- B Required flow rate of the Dredge Pump: m³/h
- C Required suction depth / cutter depth: m
- D Discharge length floating part of pipeline: m
- E Number discharge hoses:
- F Discharge length shore part of pipeline: m
- G Number of bends in shore part:
- H Total elevation: m
- I Required capacity jet water pump set: m³/h bar
- J Required power on cutter shaft: kW
- K Water mixture: * fresh / brackish / salt
- L Specific weight of solids as dumped: kg/m³
- M Average particle size of solids (d₅₀): mm
- N The solids will be abrasive: * low / middle / high
- O Automation of operation: * yes / no
