About SWALF Group

- Powered by highly skilled professionals who are driven by values and a passion to **stand out** in the industry
- Strong work ethics and insatiable hunger to give the best in whatever we do
- We have access to a vast network of resources for operation, maintenance, technology, equipment and design
- Focus on Dredging O&M, Trading, Hydraulics, Shipping and Rig Software, Marine Engineering and Transport
- Build long relationships with clients by offering exceptional services at affordable costs

Vision

To provide top-quality dredging and marine engineering services at affordable costs using indigenous technologies and set new standard in the industry.

What do we do?

Smart Solutions. Efficient Delivery

Trading

- Dredger
- Cutter teeth
- Dredging pump & spares

Dredging

- O&M contract
- Repair & maintenance
- Project Management

Hydraulic

- Power packs
- Cylinders, valves, motor pumps
- Repair & maintenance of industrial and marine hydraulics

Software

- Ship & rig management solutions
- PMS, Asset Mgmt., Project Mgmt.

Transport

- Terminal platform chassis
- Hydraulic steering systems special chassis

Stevedoring

- Special grabs
- special cranes,
- special hoisting frames
- pneumatic hoisting hooks

Strategic Partnerships

"It is not the strongest of the species that survive, nor the most intelligent, but the one most responsive to change." Charles Darwin

And this applies to business also. That is why we partner with the leaders in our industry - [Breeman International](#) - World leader in marine engineering technology and equipment.

We have partnered with them to use their technology and products to offer top-quality services.

We continue to look for strategic partnerships with companies that offer innovative technology, software, product and engineering services to the dredging and marine engineering industries

Dredging Industry in India

Huge scarcity of manpower and equipment

- **Manpower** - Huge demand for skilled people - only 60 available whereas the requirement is 1000
- **Dredgers** - Currently, 30 dredgers are operating, out of which only 17 are Indian.
- **Foreign Investment:** This shortage has forced India to depend on foreign companies
- **Training:** Acute shortage of manpower implies the lack of proper training facilities

SCARCITY

Investors

Hence, it is clear from the previous slide that there is a great opportunity waiting for investors.

We are looking for investors from India and abroad so that we can address the demand by investing in

- Manpower
- Technology
- Equipment
- Training

Quality & Innovation

The best way to predict the future is to invent it - Alan Kay

- Yes. Our goals are aligned keeping the future in mind. To prepare for the future, we believe innovation is the key.
- Our innovation approach is to use the best of technology available in the world and use indigenous materials to compensate the cost
- This ensures we offer top-quality services at affordable costs

People

- We are aware that employees are the backbone to offer efficient services to our clients.
- We carefully handpick people and train them to align with our business goals.
- Our employees have a great understanding of the nuances of the Dredging and Marine Engineering business

THANK YOU!
